
Managed Cyber Security, Connectivity and Voice Communications for Schools

Education Technology Solutions

Managed Cyber Security, Connectivity and Voice Communications for Schools

When choosing new technology solutions for schools it's important to consider the educational value, ease of use, cost-effectiveness, security and privacy, compatibility, integration and accessibility, as well as reliability and durability of the technology. Here at MPS, we offer a range of industry-leading education technology solutions, backed up by service and support that is second to none.

Cyber Security Solutions

The importance of student safeguarding, threat management and content filtering cannot be overstated. By providing a safe and secure learning environment, schools can promote the well-being and academic success of their students, while also protecting them from potential harm.

Safeguard your students and manage the content they have access to, with our Cyber Security Solutions for schools.

Internet Connectivity

Fast reliable Broadband and effective Wi-Fi networks are critical components of modern education, enabling access to online learning, collaborative and personalised learning and improved efficiency in school operations.

Switch up to ultra-fast full fibre Broadband and Next Generation Wi-Fi from MPS to better prepare students for success in the digital age.

Futureproof Networks

With ISDN and PSTN analogue networks being phased out by BT in 2025, in favour of newer Voice over Internet Protocol (VoIP) solutions, it is essential that schools review their current telecommunications systems and assess their compatibility with newer technologies.

Speak to the experienced telecommunications experts at MPS for advice on how to prepare for the planned switch-off.

Voice Communications

Voice communication systems still play a critical role in ensuring the safety and security of students and staff, enabling collaboration and coordination, involving parents in their children's education and providing students with access to resources.

Speak to MPS to ensure that you have effective voice communication systems in place to support their educational mission and enhance student outcomes.

For help and advice call us on 0330 333 6400
or email us at info@mpsplc.co.uk

With specific expertise in the education sector, MPS provides end-to-end solutions including internet connectivity, cyber security and cloud voice. Our specialist team helps you find the right mix of products and services for your needs and optimises them with ongoing, expert support.
